Press Release

MecSoft Launches Chinese Website

Irvine, CA; August 25, 2011: MecSoft Corporation, a global leader in Computer Aided Manufacturing (CAM) software, announced today the launch of a new website localized for the Chinese language.

“With the increased demand for our software in China, we are pleased to offer a website that has been localized for this market,” stated Jerry Hiller, MecSoft’s Director of International Sales. “This project was a collaborative effort with Cogito Software, our preferred dealer in mainland China.”

In addition to the language translation, the website’s design and content have been carefully scripted to be in compliance with the Chinese government’s Golden Shield Project. This provides visitors in the People’s Republic of China full access through the “Great Firewall,” a colloquial term used to describe the country-wide firewall. MecSoft’s China website can be accessed at www.mecsoft.com.cn.

About MecSoft Corporation

Headquartered in Irvine, California, MecSoft Corporation is a worldwide leader in providing Computer Aided Manufacturing (CAM) software products for the small to mid-market segments. These products include VisualMILL®, VisualXPORT for Inventor®, VisualMILL for SolidWorks®, RhinoCAM™, Alibre CAM® and VisualTURN®. The software delivers powerful, easy-to-use and affordable solutions for users in the custom manufacturing, rapid tooling, mold making, aerospace, automotive, tool & die, woodworking, and education industries.
